USG REPORT OF ABDOMEN AND PELVIS

Findings:

Liver: Liver is normal in size measuring 12.1 cm (cranio-caudal), regular in outline and homogenous parenchymal echotexture. No focal lesion seen. Portal vein is normal in caliber. Hepatic veins are normal. Intrahepatic bile ducts are not dilated.

Gall Bladder: Distended GB with multiple calculi are noted, largest one measuring 20 mm at GB neck. Minimal sludge is noted.

Common bile duct: Normal in caliber (4.1 mm). Lumen is echo free.

Pancreas: Visualized part is normal in size, outline and homogenous parenchymal echotexture. No SOL seen. Pancreatic duct is not dilated.

Spleen: Normal in size measuring 9.7 cm in long axis. Homogenous echotexture. No SOL seen.

Kidneys: Right - 9.0 cm

Left - 9.9 cm

Both kidneys are normal in size, outline and echotexture. Corticomedullary differentiation is maintained. No SOL or calculus seen. No hydronephrosis noted.

No free fluid or enlarged lymph nodes seen in the abdomen.

Urinary bladder: Urinary bladder is normal in outline, distensibility and wall thickness. No focal lesion or calculus seen.

Uterus: Anteverted, and measuring 7.0 x 2.5 x 4.0 cm. Outline is regular. Normal endometrial echocomplex. Endometrial thickness measures 4.0 mm. No SOL.

B/L Adnexa: Unremarkable.

No free fluid is noted in POD.

IMPRESSION:

- Distended GB with multiple cholelithiasis and minimal sludge
- Rest normal scan
