Issei Takino

Chief Executive Officer and Representative Director of MUJIN Inc.

MUJIN Inc.

3-8-5 Tatsumi, Koto-ku, Tokyo 135-0053 Japan

Subject: Request for Consultative Dialogue on Tech Diplomacy During Japan Visit Between April 13 to 17

Dear Mr. Takino,

I extend my warmest greetings and highest regards to you and the **MUJIN Inc.**

I am writing in my capacity as President of the **International Relations & Global Diplomacy Dialogue (IRGDD)**, a Nepal-based independent, non-profit, and non-partisan think tank dedicated to advancing international dialogue, policy research, diplomatic capacity building, and collaborative engagement. In addition, I serve as President of the **Ambassadors Club Nepal** and **The Diplomat Nepal**, roles through which I engage with diplomatic and policy communities across the globe.

As we celebrate the **70th anniversary of Nepal-Japan** diplomatic relations, there is unique opportunity for our nations to explore new avenues and enter a new era of **digital partnership**. IRGDD is committed to advancing **tech diplomacy**, fostering international collaboration, and building bridges between policymakers, businesses, and emerging tech leaders. As part of our **Diplotech framework**, we aim to promote partnerships that combine technological innovation with strategic international engagement.

Nepal is no longer just a land of mountains; it is a rising **Digital Frontier**. With a growing population of tech-savvy youth and thousands of graduates entering the global IT market every year, Nepal offers a unique, untapped synergy for Japanese tech leaders. Strengthening our relationship with Japan, an established global leader in technology, can unlock significant opportunities for knowledge exchange, joint initiatives, and sustainable growth for both our nations.

We believe your organization's vision align closely with IRGDD's mission. Through **people-to-people engagement, policy dialogue, and research collaboration**, we can explore opportunities for:

- Innovation exchange and technology-driven partnerships
- Engagement with tech talent and research networks
- Alignment with IRGDD's tech diplomacy and international engagement platform

I will be visiting Japan from **April 13 to April 17, 2026**, and would be delighted to have an introductory meeting with you or your designated representative during this window to discuss how **IRGDD** can facilitate **MUJIN Inc.**'s engagement with Nepal's growing tech sector, while advancing mutual interests between our countries.

With the highest consideration and warm regards,

Amb. Dr. Sarmila Parajuli Dhakal

President

International Relations and Global Diplomacy Dialogue (IRGDD)

Ambassadors Club Nepal

The Diplomat Nepal

Former Ambassador of Nepal to Spain and Oman
