## ABOUT ME

I am a versatile IT student with a strong analytical mindset and interests across multiple areas of technology, including project management, data science, and software development. I enjoy applying my technical knowledge to real-world problems while supporting efficient teamwork and organized project execution. Adaptable and eager to learn, I aim to contribute to impactful technology-driven solutions while continuously expanding my skills.

## TECHNICAL SKILLS

- Programming Languages
  - C
  - C++
  - HTML
  - CSS
  - JavaScript
  - Foundation of React
  - Foundation of Python
- TechStacks
  - Next.js
  - React
  - JavaScript / TypeScript
  - HTML5, CSS3
  - Responsive Web Design
  - Tailwind CSS / CSS Modules / Styled Components
  - Next.js API Routes / Server Actions
- Fundamentals of Agile Methodologies
- Database Management
  - SQL and tools
  - RDBMS
  - MS Access
  - Python
  - Apify (Actors, API Integration, Web Automation)
  - Data Analysis & Visualization Tools
  - MongoDB
  - PostgreSQL
- Design Tools
  - Figma
  - Canva
  - Webflow
  - Adobe
  - Photoshop

## EDUCATION

February 2023-Present

**KING'S COLLEGE, BANESWOR, KATHMANDU**

- Bachelors of Science in Information Technology (BSc. IT)

2020-2022

**KATHMANDU UNIVERSITY HIGH SCHOOL**

**CHAUKOT, PANAUTI**

- Studied Science Faculty with Computer, Mathematics, Physics, and Chemistry as core subjects
- GPA 3.47 in Grade 11
- GPA 3.51 in Grade 12

2020

**VIDHYA SAGAR ENGLISH SECONDARY SCHOOL**

**BANEP, KAVRE**

- Completed Secondary Education Examination (SEE)
- Completed Schooling with GPA 3.80

## PROJECTS

- Numerical Computer: C Programming
- Library Management System: Relational Database Management System Through SQL
- Hangman Game: C++
- Student Information Management System: C++
- Data Management of A Hotel Company: Python, Jupyter Notebook, Scikit-learn, Matplotlib, Pandas, Seaborn
- E-Commerce Website (Web Development)
- Portfolio Website (Frontend, Figma: UI/UX)
- Wine Quality Data Set Analysis
- Smart Waste Management System: React, Node.js, PostgreSQL, MongoDB, Firebase, Vercel, Heroku, Open AI, DiagoFlow, Mapbox, Polygon
- Real-Time Job Market Tracer (Django, Python)
- Full-Stack Website Project (<https://ambassadorsclubnepal.com>)

|                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
